

I am unable to proceed beyond the below build even though my engine is running

```
dhiuhu@DESKTOP-ATLGL31: ~  
=> ERROR [internal] booting buildkit                                0.2s  
=> => pulling image moby/buildkit:buildx-stable-1                  0.1s  
-----  
> [internal] booting buildkit:  
-----  
WARNING: No output specified with docker-container driver. Build result will only remain in the build cache. To push result image into registry use  
--push or to load image into docker use --load  
ERROR: error getting credentials - err: fork/exec /mnt/c/Program Files/Docker/Docker/resources/bin/docker-credential-desktop.exe: exec format error  
r, out: ``  
dhiuhu@DESKTOP-ATLGL31:~$ docker build -t simple-web-app .  
[+] Building 0.2s (1/1) FINISHED                                     docker-container:kind_wright  
=> ERROR [internal] booting buildkit                                0.2s  
=> => pulling image moby/buildkit:buildx-stable-1                  0.1s  
-----
